

My MPhil Project Title

Outline

Here I describe an overview of what my project was about.

Background

Here I describe what problem I am trying to solve and why.

Formulation

Some equations to solve:

$$a^n + b^n = c^n \quad n \geq 3$$

For more fancy equations, see [1].

My results

The following graph shows my coffee intake over the year:

Figure 1: x-axis is time in months, y-axis is espressos per hour

References and Acknowledgements
